ABOUT ME

QA Automation Engineer experienced in software testing and test automation for web and mobile applications across retail, financial services, and industrial sectors. Skilled in test planning, test case design, functional testing, and defect management using Azure DevOps. Proficient in Playwright, with hands-on Appium experience and working knowledge of Angular and Flutter. Familiar with SDLC, STLC, and application security testing methodologies, including SAST, DAST, and SCA.

EXPERIENCE

QA AUTOMATION ENGINEER, BINASYSTEM | GUAYAQUIL, EC **June 2026 - Present**

- Collaborated with a seven-member team across 5+ enterprise projects in the financial services, industrial, and retail sectors, managing and documenting end-to-end software testing processes.
- Developed and managed 8+ test plans for web and mobile applications, and reduced regression testing execution time by up to 55% through the automation of 60+ test cases using Playwright.
- Analyzed code security pipeline results to identify potential vulnerabilities, report findings to development teams, and support timely remediation.

WEB DEVELOPER INTERN, TELCONET S.A. | GUAYAQUIL, EC **February 2024 - August 2024**

- Collaborated as part of a five-member team developing AI-integrated web applications and software solutions.
- Proposed two new features for a data processing system, enhancing real-time video surveillance analytics capabilities.
- Developed and implemented new features for an automated reporting tool, improving cross-departmental communication and maintaining data integrity across shared information.

EDUCATION

MECHATRONICS,
ESCUELA SUPERIOR POLITECNICA DEL LITORAL

PROJECTS

FOCAL **2026**

Built an asynchronous image processing pipeline with Spring Boot. Helped me get further understanding of software security, rate limiting, microservices, APIs, queue management and cloud services.

FACIAL FILTERS APP **2025**

With a teammate, we created a Python app to apply real-time filters on faces using facial landmarks. We used MediaPipe as our landmark generation tool, OpenCV for video feed capture, and Tkinter for UI.

SKILLS

Technical: JavaScript/TypeScript, Playwright, Appium, REST APIs, SQL, Git, Docker, Linux, Apache JMeter, OWASP.
Soft: Teamwork, Effective Communication, Adaptability, Customer Service, Critical Thinking, Curiosity.
Languages: English - B1/B2, Spanish - Native
